

## About

Sahriar Ahamed is a self learned-independent Researcher and An expert in Time/space/relativity who discovered first ever that second, minutes hours months or years are not the unit of time but the unit of rotation of the earth; precisely that includes Physics, Meta Physics, Nanotechnology, Cosmology or even Astronomy. Also, working in the sector of education in Bangladesh. Owning a small academic institution(Explorative Academy) from where he helps the kids to prepare their institutional curriculum. As well doing social works for the helpless and deprived. Sahriar Ahamed ; studied SSC at Saint Joseph's High School in Khulna Bangladesh. HSC from Government BL University College, khulna Bangladesh and managed eligible to Pass in Bcom (hons) from Desh Bondhu College, University of Delhi, India. He also got Bcom degree and Mcom from BL University College under National University, Bangladesh. Further,he accomplished Post graduate diploma in marketing management from Bangladesh Institute of Management ( BIM). Also had done a short course on Solar and Renewable Energy Equipment Installation from Solar and Renewable Energy Department, University of Dhaka. Bangladesh. Sahriar Ahamed has a passion in Physics and theories those are given by different scientists particularly, Albert Einstein, Stephen Hawking, Sir Isac Newton. The passion was deep, the activities had done accordingly. Due to the reason he researched with tremendous determination without any affiliation and funding for more than a decade. Thus some books, blog writing and research articles are now available globally to guide the new researchers towards an era of a new dimension. He has an identification from the web of science his Web of science researcher ID: ABQ -3640-2022 Orcid ID: 0000-0002-5863-2524 Online profile available in different media

## Books

1. Theory of relativity of time and of evaluation of human civilization Actually, this book is a higher level thought base. Because it has described a process to value the human civilization besides which can provide us valuable knowledge as -Time/ space /relativity. From its name we can conclude that best thing can be achieved through valuing humanity. In detail "Theory of relativity of time "- tells us about Time and relationship between past, present and future from this book. Also you can get where time is constant. Human has to be valued on the earth - is last and final thing we need to do on the earth. And there is a thought by which we can do it. At the 2nd part humanity valuation process is described.
